Education

McMaster University

Hamilton, ON

Bachelor of Engineering – Software Engineering. cGPA: **3.98/4.0**

September 2021 – May 2026

- **Achievements:** The McMaster University Award Of Excellence, Provost Honors Award & Dean's Honor List

Technical Skills

Languages: JavaScript · TypeScript · Java · Python · HTML · CSS · SCSS · Latex · Bash · JSON · yaml · SQL

Libraries & Frameworks: React.js · Node.js · Next.js · TailwindCSS · Bootstrap · React Native · Apache Maven · Flutter · Mantine UI · MUI

CI/CD: Git · GitHub · Jenkins · Docker · Kubernetes

Tools & Platforms: Linux · Stripe · MS Office (Word, Excel, Powerpoint, Outlook) · UML · Photoshop · MongoDB · MySQL · AWS · Azure · Google Firebase · RESTful API · Webpack · Jira

Experience

Royal Bank of Canada: **Technical Systems Analyst** | Toronto, ON

September 2023 – April 2024

- Worked in a team of 5 to troubleshoot and resolve internal customers issues and on-boarding requests related to RBC's public cloud platforms (AWS, Azure, GCP)
- Created and maintained documentation for troubleshooting procedures, best practices, and knowledge based articles which resulted in a 25% less time spend on future similar issues
- Contributed insights in daily Jira ticket review meetings, fostering a collaborative environment and reducing average resolution time by 20%
- Collaborated with cross-functional teams, including DevOps and SecOps to troubleshoot complex technical issues, resulting in quicker time to resolution and an increase in customer satisfaction

Google Developer Student Club: **Workshops and Talks Member** | Hamilton, ON

September 2022 – April 2023

- Collaborated with a team to create and present interactive workshops on emerging technologies, including machine learning, and artificial intelligence, to over 50 attendees per session
- Researched and analyzed emerging technological trends to ensure workshop content was relevant to attendees, resulting in a 90% satisfaction rate among participants in post-workshop surveys

Rama Tech Centre: **Computer Technician Assistant** | Mississauga, ON

September 2019 – January 2020

- Assisted in the installation, configuration, and maintenance of computer operating systems, hardware, and software packages, demonstrating a strong foundation in system administration and troubleshooting
- Developed strong communication skills, effectively explaining technical issues and solutions to clients with varying levels of technical knowledge, resulting in increased customer satisfaction

Projects

ExoTech - Ecommerce Website | TypeScript, React.js, Next.js, MongoDB, Stripe, Firebase |  

- Developed a full-stack electronics e-commerce website using TypeScript, MongoDB, React.js, and Next.js, following modern UI/UX principles and responsive design practices
- Implemented user authentication and account management using Next-Auth, enabling secure registration, login, and profile management. Integrated Stripe for seamless checkout and payment processing, ensuring secure payment verification and data privacy. Leveraged Firebase Storage for efficient product image storage and retrieval

Island Generator | Java, JUnit, Apache Maven, Apache CLI, JTS Library | 

- Collaborated in a team of three to develop a software application for a client that generates and visualizes 2D island meshes through following an iterative and incremental approach using SOLID principles and design patterns
- Integrated JUnit and testing into the DevOps workflow, ensuring that the software application meets the quality requirements during the development and deployment process

Expense Tracker | Typescript, JavaScript, React.js, Mantine UI, Vite |  

- Developed a sleek and user-friendly front-end expense tracker web application using TypeScript, React.js and Mantine UI library that utilizes the web browser's local storage to store user data
- Visualized user budget and expenses in a pie chart using HTML Canvas API enabling users to visualize their spending and make informed financial decisions
